### Skills

RELIABILITY ENGINEERING

### Full job description

This Senior Engineer role is a great job opportunity of working for Commonwealth Bank at their brand new offices based in Sydney CBD.

#### Your new company

Commonwealth Bank are looking for an experienced Senior Engineer to join their dynamic team. This is a permanent role based in Sydney which offers remote working and a flexible workplace.

#### Your new role

As a Senior Engineer you will work to develop, maintain, operate and continually improve CBA's logging and monitoring tools via the use of configuration management tooling and CI/CD pipelines. As part of your role, you will need to gather requirements, communicate with key stakeholders, design solutions for new features as well as to continually improve the platform, whilst maintaining platform stability, in line with Site Reliability Engineering best-practices.

#### What you'll need to succeed

- Experience in working with Splunk and knowledge of Splunk Enterprise Cloud, Splunk Enterprise Security and ITSI
- Experience in managing, deploying, supporting, documenting and promoting systems configurations via Configuration Management to Production and or CI/CD Pipelines
- Ansible or Python Scripting experience
