Full job description

Capital Procurement Specialist for well-known global resources company.

Based in their Peel office and reporting to the Procurement Manager – Capital, you will be working with and supporting Project Managers for allocated projects across our sustaining and growth capital program for their Mining and Refining locations in Western Australia.

Duties:

- Maximise commercial advantage by leading the development of effective sourcing and contracting strategies to ensure the efficient achievement of project goals.
- Minimise commercial risk through the implementation of robust contractual terms, while reducing the total cost of acquisition and ownership
- Execute and manage all market engagement such as Requests for Information (RFI), Requests for Proposal (RFP) to meet project goals (EH&S, schedule, quality and TCO) for assigned projects.
- Lead the negotiation process and contract administration of all elements of assigned projects
- Ensure the implementation of contracts, performance management and supplier relationship management for assigned projects.
- Lead the resolution of commercial issues associated with supplier performance at project level
- Provide guidance and leadership to projects to ensure strategies developed for sourcing packages within projects is aligned with the overall program, regional and global strategies.

Qualifications:

- Relevant qualification in Procurement, Supply Chain Management,

Engineering, Business or equivalent in an Engineering or Construction related field is required.

- Extensive experience in providing procurement and contract management services within capital projects in the Mining and Resources industry, large construction projects or similar.

To be successful in the role you will have well established communication and interpersonal skills along with a proactive and innovative approach to problem solving. We are looking for a collaborative team player with a drive for achievement and a commitment to ethical and high-quality work practices.
